

Joint Committee
1st Meeting
5 September 2024
London, United Kingdom

**ICO composite and group indicator prices:
Share of markets and group weightings
Calendar year averages: 2021 to 2023
Effective from 1 October 2024**

Background

1. Every two years, in accordance with the Rules on Statistics – Indicator prices, contained in document [ICC-105-17](#), the market share in each group and their weightings for the calculation of the ICO composite and group indicator prices shown in Annex I of that document should be reviewed.
2. The last review took place in 2021 when the Statistics Committee recommended to the Council that the new group market shares and their weightings take effect from 1 October 2021 in accordance with the data presented in document [SC-104/21](#).
3. Table 1 gives the latest information on average exports of green coffee in calendar years 2021 to 2023 to all destinations, to the European Union and to the USA by group of coffee. It also provides the share of the markets in each group of coffee and their weightings (current and new) in the calculation of the ICO composite indicator price and the group indicators in accordance with the Rules. Table 2 gives the proposed group weightings and market shares which, if agreed, would come into effect from **1 October 2024**.

Action

The Joint Committee is invited to consider this matter and to make recommendations to the Council.
