2nd meeting
30 September 2011
London, United Kingdom

**Progress report on the implementation
of the Coffee Quality-Improvement
Programme (CQP)
Calendar years 2005 to 2010 and
January to June 2011**

Background

1. Resolution 420 requests exporting Members to indicate in box 17 of all Certificates of Origin, on a voluntary basis, information on the quality of the coffee exported including defects and moisture content. This allows the monitoring of the level of compliance with the target standards set out in the Resolution using the Certificates of Origin as its source.
2. The information presented in this document is based on data received from Certificates of Origin (in electronic or paper format) issued to cover coffee exported in the six full calendar years – 2005 to 2010 – since Resolution 420 came into effect, as well as the first six months of 2011. It also contains information on the implementation of the CQP in exporting Members in this period. The previous progress report on the CQP is contained in document PM-4/11.
3. The entry into force of the ICA 2007 has automatically brought into effect the new Rules on Statistics – Certificates of Origin – contained in document **ICC-102-9**. Although it is still voluntary for exporting Members to provide the information requested in Box 17 of the new Certificate of Origin, it is expected that they will be encouraged to comply with this request as the various data fields in this area are now visible on the Certificate to ensure greater market transparency.

Action

The Promotion and Market Development Committee is requested to take note of this report.

**PROGRESS REPORT ON THE IMPLEMENTATION OF THE
COFFEE QUALITY-IMPROVEMENT PROGRAMME (CQP)
CALENDAR YEARS 2005 TO 2010 AND FROM JANUARY-JUNE 2011**

1. Since Resolution 420 came into effect in June 2004, 28 exporting Members have provided full or partial information on the quality of the coffee they export, through Certificates of Origin. Under the current membership of the ICA 2007, which came into effect last February, 23 out of the 33 exporting Members have fully implemented the Resolution in their countries.

2. As Members have 12 months from the entry into force of the ICA 2007 to implement the Rules on Statistics – Certificates of Origin – in full, exporting Members can be grouped in six categories in respect of volunteering the information on quality:
 - a. Countries providing data regularly: 23 Members
 - b. New Members yet to issue Certificates of Origin: 4 Members
 - c. Countries that appear to have opted not to issue Certificates of Origin: 1 Member
 - d. Countries not sending information on Certificates of Origin: 2 Members
 - e. No data (Certificates of Origin) received: 3 Members
 - f. Members of the ICA 2001 that have not yet completed requirements for membership in the ICA 2007: 16 Members

3. On the basis of the Certificates of Origin issued and on the current membership of the ICA 2007, the volume of green coffee exported by the 23 Members represents about 67.4% of the total green coffee exported during the six full calendar years (2005 to 2010) by all exporting countries. In the first six months of 2011, however, this share increases to 72.1%.

4. The total volume of green coffee exported by all exporting countries in the six complete calendar years (2005 to 2010) averaged 87.6 million bags. The total volume of green coffee exported by the 23 countries volunteering information on the quality of their coffee exports averaged 76.9 million bags in the same period – equivalent to 87.8%.

5. Graph 1 below shows the total volume of green coffee exported by all countries with the breakdown between the coffee in compliance with Resolution 420 and the remainder exported by all other countries. Compliance with the Resolution has increased somewhat since its adoption back in June 2004. Table 1-A gives the volume of all the coffee exported on the basis of Certificates of Origin issued by exporting Members of the ICA 2007 and those under the ICA 2001. Similarly, Tables 1B to 1F give the volume of green coffee exported in accordance with the standards set out in Resolution 420, as follows:

Table 1-B: Volume of green coffee in full compliance with the target defect and moisture standards (“S”)

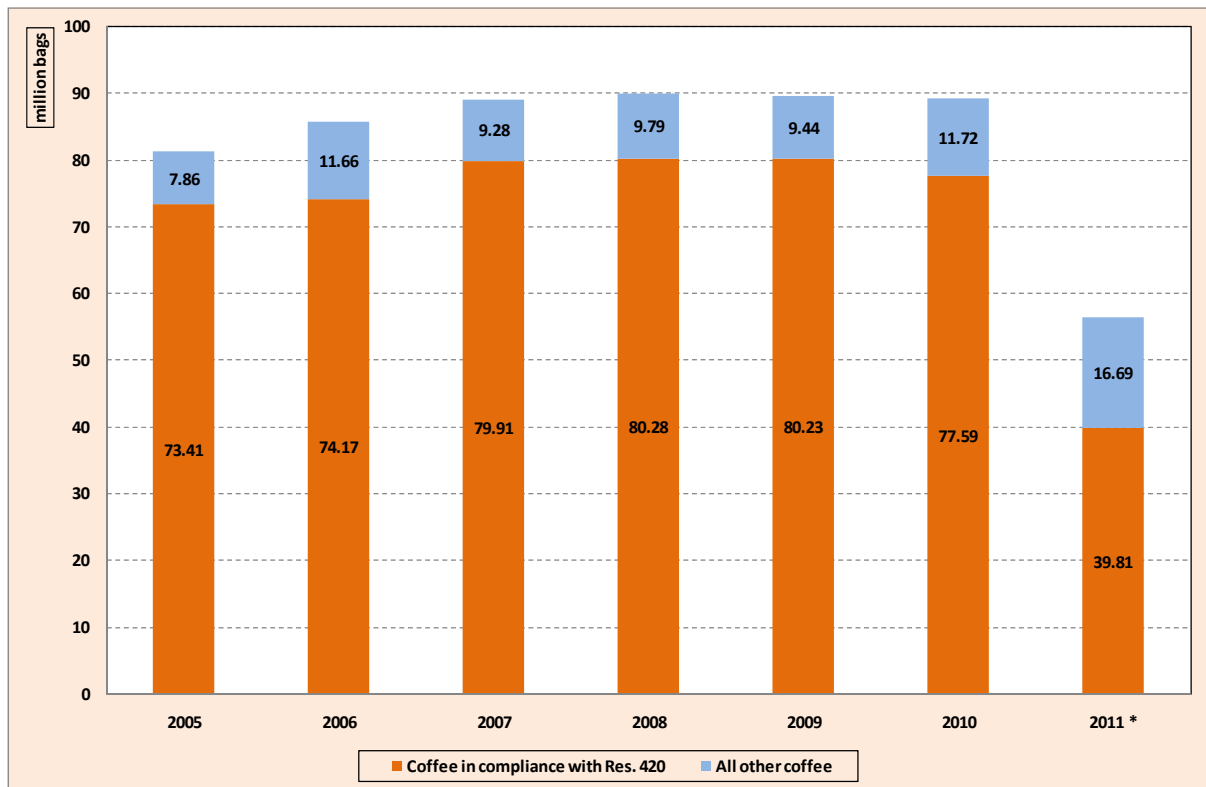

Table 1-C: Volume of green coffee non-compliant with the target defect standard (“XD”)

Table 1-D: Volume of green coffee non-compliant with the target moisture standard (“XM”)

Table 1-E: Volume of green coffee non-compliant with either target defect or moisture standards (“XDM”)

Table 1-F: Volume of green coffee with quality unspecified

**Graph 1: Volume of coffee exported in compliance with Resolution 420
Calendar years 2005 to 2010 and January to June 2011**

* January-June

6. Summary Tables 2-A to 2-C show the data extracted from Tables 1-A to 1-F with the breakdown into Arabica and Robusta.

7. The Organization will continue to monitor compliance with Resolution 420 by exporting Members.
